

# Broadband and Phones

## Hosted Voice Phone Systems

Businesses that switch to a hosted voice system make substantial cost savings. Individual phone lines (PSTN and ISDN) are no longer required and with no system infrastructure you save on equipment and maintenance.

### Key business benefits

- **Inclusive calls** to landlines and mobiles
- **Save** on line rental, equipment & maintenance
- **Advanced call features:** include voicemail, hunt groups, call-recording, conferencing, call monitoring, and CRM integration
- **Present a professional image** with auto-attendant, menu-driven call answering
- **Work from anywhere** and on the go
- **PCI and MiFID II Compliant**
- **Disaster recovery:** just plug your phones in and you're back online; and when you move premises the numbers stay with you
- **Keep existing numbers** or get new numbers for any region of the country

### BT Cloud Voice Basic
